Job Description

ABOUT US

Radom is a global leader in advanced plasma technologies. We provide sustainable and innovative plasma solutions for industries including analytical instrumentation, clean tech, and hydrogen generation.

Our products and instruments lead to safer processes, faster performance, and the reduction of pollution with the promise of continuing to detoxify our earth.

OVERVIEW

The Product Manager role is for an individual who can combine both product planning and marketing to manage the entire life cycle of the atomic spectroscopy portfolio. We are seeking a team player who will be responsible for gathering customer requirements and defining their vision with engineering as well as overseeing product strategy, pricing and positioning strategies. If you have strong organization skills, a passion for simplifying the complex and want to be part of propagating the latest technology for atomic spectroscopy to the world, please apply.

Responsibilities

- Spectroscopy instrumentation specification expert
- Guardian of commercialized products
- Commercialization forward thinking to portfolio expansion
- Close working arrangement with Business Development Manager to ensure spectroscopy portfolio is aligned with business objectives
- Voice of the customer or application driven product enhancements to increase portfolio capabilities, market presence, growth and revenue

Qualifications

- 5 years' experience in spectroscopy product management
- 5 years or greater experience in commercialized product management
- Team player
- Ability to coordinate and prioritize activities.
- Strong understanding business management of material goods versus selling price
